Subject: Revised Mandatory Guidelines FR DOCKET 04-7984.

I am requesting that the government accept the reasoning that some individuals have difficulty urinating on request (a recognized condition known as paruresis.). The inability to urinate should not be confused with a refusal to urinate. The use of oral fluid, hair, or sweat tests should be made available for anyone who requests them, but especially for those asserting that they suffer from paruresis.

Thank you.
